

PhD scholarships available in climate change and heat extremes

Interested in climate change? Fascinated by extreme heat events? Want to know more about how these events are changing, and who or what is responsible?

Then come do a PhD with me, @ UNSW Canberra!

- Generous \$35000 per annum stipend for honors class one or equivalent applicants
- Broad range of topics available, spanning detection and attribution, physical model projections and investigations, and/or the impacts of heat extremes
- Background in climate science, physics, maths, atmospheric science or related fields are desirable.
- Support and collaboration with the ARC Centre of Excellence for Climate Extremes, particularly the attribution & risk program
- Contact me for to discuss your research ideas!
